FULLY MANUAL. FULLY METAL BODY.
The only wooden binder asking to be owned and admired

Performance Description

Punching:

These punch dies can be disengaged as required to suit the size of paper being punched. To disengage a punch, simply pull out the desired *Punch Selector* by hand. To re-engage, simply press it to the original position.

1,24 selectable punches
(marked from 1 up to 24).

Binding:

Take out the punched sheets from the *Punching Channel* and position them vertically in the open comb. Locate the punched holes over the open comb fingers and rotate the sheets forward onto the comb.

When all the punched sheets are loaded onto the plastic comb, release the *Binding Handle* to its original position to close the plastic comb completely. You can now remove the bound booklet and enjoy your finished work.

Emptying the Waste Tray:

Take out the *Waste Tray* from the back side of the machine. For best results, empty the tray regularly.

Specification

Size	Sheet Capacity	Margin
6mm (1/4")	20	2mm
8mm (5/16")	40	3mm
10mm (3/8")	70	4mm
12mm (1/2")	100	5mm
14mm (9/16")	120	6mm
16mm (5/8")	140	7mm
19mm (3/4")	160	8mm
